This Office action is responsive to applicant communication filed on 20 August 2003.

The Examiner acknowledges the amendments to the claim filed.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 5-17 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/041,008. Although the conflicting claims are not identical, they are not patentably distinct from each other. In the co-pending application, the independent claim, claim 1, discloses a quadrangular mixing rod with an inlet and outlet area, to guide light through the inlet area to the outlet area to illuminate a quadrangular field where the angles of the quadrangular inlet and outlet areas have one or two angles to be 90° and the others to be at an angle not to be 90°. In the current application, claim 1 discloses all that the co-pending application does except the current application discloses an angle of the quadrangular inlet or outlet area to not have an angle of 90°. Since both applications disclose an angle in the quadrangular mixing rod not to be 90°, the current application does not specify an angle

measurement, and the current application does not state an additional angle can not be 90°, it would have been obvious at the time the invention was made to a person having ordinary skill in the art that a light mixing rod with a quadrangular illuminating field claimed in the current application states the same basic angle restrictions as the light mixing rod in the co-pending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

In regards to the 35 U.S.C. 102(b) and 35 U.S.C. 103(a) rejections, Applicant's arguments together with the amendment filed on 20 August 2003, have been fully considered and are persuasive. The previous 35 U.S.C. 102(b) and 35 U.S.C. 103(a) rejections has been withdrawn.

In regards to the doubling patenting rejection, Applicant's arguments, filed 20 August 2003, have been fully considered but they are not persuasive. The Terminal Disclaimer filed by the applicant has been disapproved because the attorney who as filed the Terminal Disclaimer is not of record.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
